Delicate Industry Design, Excellent Workmanship

精致的外形，精良的做工

US24192i Decoder Pre-amp has elegant Industry Design, rich controls with AMC extra superb technologies & excellent workmanship. Similar to other AMC products, the unit is constructed with metal materials with delicate designs. The surprises is also with very attractive market prices.

Why US24192i is such a high value for the money unit? Because only the rich decoding & pre-amp features already worth for it, for you to upgrade whole AV system with standing out sound stage and superb sound quality.

US24102i has very complete I/O, AES/EBU, USB, Optical, Coaxial etc for adopting widely more music sources.

AMC has very thoughtful user friendly designs. On front panel, similar to AMC CVT1030MKII pre-amp, it is with very classy designs with all classical rotary controls very nice touch.

The what you see what you get classy controls give very user friendly touch. And users do not need user manual to operate the unit. It is very convenient.

Test Report

参数

- 输入接口：USB Audio Class 2.0、OPT x 4、AES、COAX x 2
- 输出接口：COAX Digital接口、Unbalanced Audio Outputs (RCA x 2)、Balanced Audio Outputs (Canon Connector x 2)
- THD：0.0025% ● S/N Ratio：114dB
- 体积（WHD）：430mm×80mm×307mm ● 重量：6.2Kg

with 24 Bit 192 kHz DAC Decoder chip set

具备24 Bit 192KHz DAC解码芯片

US24192 has 24Bit 192kHz DAC Decoder chip set with 24Bit 192kHz up-scaler capability that can handle current main stream audio decoding requirements.

Existing multi-channel Audio bandwidth and resolutions are normally with 44.1k / 16 bit with highest frequency up to 22kHz. With 96kHz oversampling, the highest frequency can be up to 48kHz. That made 24Bit 192kHz oversampling becomes very essential.

It has become basic requirement of DAC pre-amp. And 24bit/192k is the main feature of US24192 Pre-amp.

With US24192 decoder pre-amp, it made music streaming, CD with much better resolution and accuracy music. Music lovers can enjoy the superb sound quality at AMC demo rooms.

感受US24192i解码前级放大器的优秀功能

At AMC demo room, with US24192, we listened <<Songs From the Arc of Life>> and found very details and rich superb quality.

It plays string music with very rich details. Through Cello, you can hear the extension of high freq to give very rich touch of air.

In the music, Piano and Cello, the piano gently breaks the chords, while the cello plays the melody of the Virgin Mary's praises. The standing out piano touches, clear particles of the harp are set off. The cello is soft and silky with stringy luster.

US24192 does give very satisfactory listening experiences.

It does also give excellent low frequencies.

Playing <<Inspire>>, at low freq, the cello and harp faintly played, showing the intricate texture of the bow as it struck the strings. During louder, it seems with the touch like melt chocolate pour out from pot, mellow and rich.

Play <<Jazz pawnshop>> , US24192i introduced very wide sound stage with very accurate positions and standing out clearly each music instrument.

Play <<Limehouse Blues>>, fill up the mood in the bar, sound of cups, guests' chatting, details of cash machine closing sound plus music from stage, bass, sound balance, coming the Solo drum, vivid Jazz coming, wooden pipe, harp, bass plus jazz drum, Jingle sound crisp and sweet, US24192i introduced standing out Bass, clear image and gave enough dynamic range.

Play <<Diabolus in Musica>> giving charming high freq details. sound of triangle iron sounds like silver bell. Violin sounds clear, tight and thick.

Play Adele <<25>> "Million Years Ago", Adele's thick, husky voice sounds solid and not too moist with solid, crispy sound stage with details. It is really excellent to use US24192i to enjoy vocal musics !

Summary 结语

Again, US24192i Decoder Pre-amp shows AMC's excellent design and rich features. Believe many AV music lovers will love it. With AMC other various equipments, it will bring more rich choice for AV music systems. I
